Mohamed Elansary joined BE in 2013 as the Director of Law Enforcement, National Security, and Defense Business Units. He currently serves as BE's Vice President of Global Operations. Mohamed is responsible for service delivery operations to BE's customers. Additionally, Mohamed supports growth through ensuring high delivery standards as well as leveraging customer relationships to expand existing work and identify new work opportunities. As a key member of the leadership team, Mohamed also helps shape strategic planning and policy.

He is a high-performing, results-oriented executive and a certified PMP with over 15 years of experience and in-depth knowledge of the commercial and federal civilian IT market. Mohamed excels in providing transformational leadership to the federal government and commercial clients through the use of innovative technologies and best business practices. He is a subject matter expert in Business Intelligence and Data Warehousing having deployed the CEB, USPS, US Courts, and DC Courts Enterprise Data Warehouses.

Prior to BE, Mohamed served as the Director of Judiciary Services for Guident. He served in a number of increasingly responsible positions starting with Arthur Andersen Business Consulting where he started his professional career as a Consultant and Senior Consultant, Beta Programs Manager for MicroStrategy, Professional Services Manager for CAST Software, Project Manager for Anteon (GDIT), and Director of IT for Corporate Executive Board (CEB).

Mohamed graduated from George Mason University with a Bachelor's degree in Business Management. He is a certified Project Management Professional (PMP), a Teradata Certified Professional, and is MicroStrategy Certified. Mohamed is an active AFCEA and PMI member and he has volunteered for AFCEA Bethesda's Law Enforcement IT Day since 2011

**Why are you interested in serving on the InfraGard National Capital Region Board of Directors?**

I'm interested in promoting the mission of Infragard for more ongoing dialogue and timely communication between members and the FBI specifically concerning the security of, vulnerabilities in, and threats to critical infrastructure entities. Specifically, I'm looking to get more of my colleagues who are government contractors to become aware of Infragard, join, and participate.

**Briefly describe a 'large scale' personal or professional initiative or program you have taken on in the past? How has that experience shaped you as a potential Board Member?**

Professionally, I helped start new technology practice areas at Buchanan & Edwards. This involved developing a new matrix organization for the whole company. Personally, I volunteer for Kids Run the Nation. I enjoy teaching kids on the benefits of running.

**As a member of the board, how would you interact with our chapter's members to enhance InfraGard's mission?**

I would like to leverage my network in the GovCon space as well as technology to promote Infragard for new members. In addition, I would leverage technology for communication and collaboration with existing members. Specifically, I would like to further promote the benefits of Infragard to existing and new members.

**What do you think is the biggest challenge facing InfraGard and how would you address this challenge?**

I think the biggest challenge is member participation and engagement. The more members are engaged, the greater the benefit to those members, to the FBI, and to the mission of Infragard.
